PROFESSIONAL PROFILE

Management Information Systems (MIS) student with a strong academic background in web development, database management, and information systems. Skilled in developing web applications using HTML, CSS, JavaScript, PHP, SQL, and MongoDB, with additional experience in Java and Python. Experienced in building academic projects involving web development, databases, translation systems, and management applications. Seeking an entry-level Web Developer or MIS position where I can apply my technical and analytical skills.

PROFESSIONAL EXPERIENCE

Freelance Web Developer

2024 – Present

Lebanon

- Design and develop responsive websites using HTML, CSS, JavaScript, PHP, and React.js based on client requirements.
- Set up website pages, navigation, forms, content, and basic database structures.
- Perform website content updates, maintenance, troubleshooting, and performance checks.
- Assist clients with hosting setup and minor technical improvements.
- Manage projects independently, from gathering requirements and development to testing and final delivery.

SELECTED PROJECTS

Hospital Management System

- * Developed a web-based hospital management system.
- * Implemented CRUD operations for managing doctor data.
- * Created doctor availability and status features.
- * Implemented authentication and role-based access (HR).
- * Designed responsive user interface and database integration.

Translation and Travel Assistance - Web Application

- * Developed a web application for assisting travelers abroad.
- * Implemented multilingual translation (Arabic, English, French).
- * Integrated APIs for translation, currency, weather, and location.
- * Added voice and image translation features.

Olive Oil Store Website

- * Developed a simple e-commerce style interface.
 - * Designed product display and navigation.
 - * Applied responsive design principles.
